Mobile Business Solutions

Building Visions, Shaping the Needs

www.shallwa.com

Amidst the Kingdom of Saudi Arabia's transformation towards achieving a global center for the business, the demand for smart solutions that meet the changing market needs witnesses steady increase. From this point, **SHALLWA** comes into being to provide its innovative services in the field of mobile business solutions.

We believe that the future of business lies in flexibility and adaptation. We place our extensive experience at the service of our customers to design mobile solutions that meet their unique needs, whether it is mobile offices, command and control rooms, business centers, specialized medical laboratories, or even mobile workshops and command and control centers.

Since our incorporation in 2018, we have been pioneers in providing new solutions that are appropriate to the changing market needs. In 2022, we incorporated a company specialized in building trailers of all kinds and modifying vehicles and mobile buildings, in cooperation with international and local partners who are extensively experienced in such field.

With **SHALLWA**, you can be sure that you are getting high-quality mobile solutions that satisfies your needs and help you realize your goals.

PRESIDENT'S SPEECH

We, **2A INDUSTRY**, believe that success is achieved by hard work and commitment to quality and customer satisfaction. We are in possession of extensive experience in various local and international commercial and industrial business lines, which makes us to command abilities necessary for provision of distinct models that satisfy the needs of our customers.

We have incorporated Shallwa with the aim of providing mobile business solutions that are suitable to our environment and meet our needs. We work with the client from the beginning of creating and developing the idea, describing and building the need, transforming it into integrated conceptual and constructional plans, then describing and formulating its specifications for the purpose of implementing.

In **SHALLWA**, we rely on transferring the specialized knowledge and benefiting from global experiences in several areas, as well as commitment to quality, ensuring the implemented product, and aligning design and implementation with customers' environmental requirements and climatic conditions; in parallel, we build a strong relationship between technology developers and customers.

We also provide a range of specialized services appertaining to building trailers, modifying vehicles, providing spare parts, supplies and equipment appertaining thereto, installing and maintaining them, and providing the necessary support to our customers, whether in the public government sector or the private's.

We keep adherence to providing high quality products and services that meet our customers' needs and contribute to achieving their goals.

OUR MISSION

Our mission is to be the first partner for the customers in localizing the trailer industry with specifications that are proper to our needs as Saudis and suit the environmental nature of our country; and to provide solutions that are different from others, innovative, high-quality and unique.

[A] BUILDING TRAILERS:

We offer exceptionally distinct models of trailers according to customers' different needs as may be suitable for the nature of use.

We implement the medical trailers and mobile laboratories, as well as trailers for military or civilian service use, or offices and laboratories.

[B] MODIFYING VEHICLES:

Existence in different places for provision of support services far from the main headquarters is an important requirement at the present time. Hence, the need for support vehicles has become a necessary for various sectors.

We implement all types of vehicles of all types, applications and equipment, by analyzing the customer's needs and providing technical solutions that meet the needs of the beneficiary of the company's experience and its partners.

[C] MODERN MOBILE BUILDINGS:

Mobile container buildings, caravans and prefabricated rooms are characterized by ease of transportation and assembly, and multiple contemporary and modern designs, in addition to a strong and durable structure that is resistant to rust, corrosion, wind and water. They are also very safe and environmentally friendly. They are available in affordable and wide choices of sizes.

Prefabricated dormitory and office containers are of high quality. They can be used as mobile or fixed solutions. Our mobile and fixed units serve construction sites, work sites and factories. Our prefabricated and portable modules allow you to create residential rooms, offices and accommodation space with sleeping facilities and sanitary facilities such as toilets and showers. They can be assembled to form integrated business buildings.

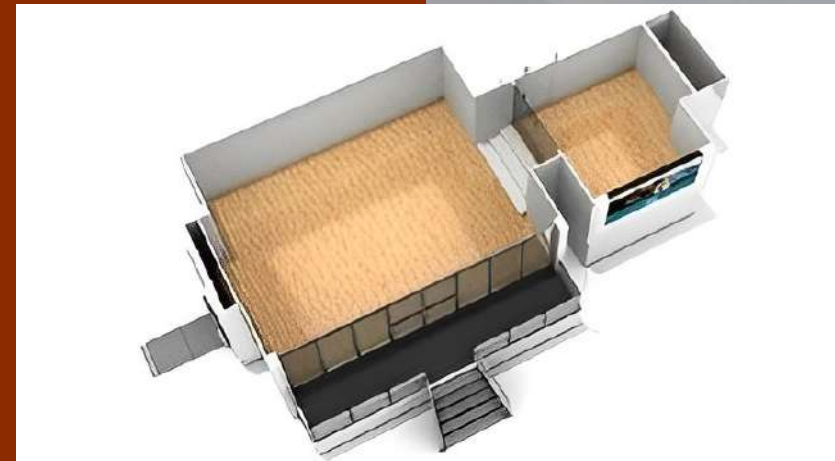

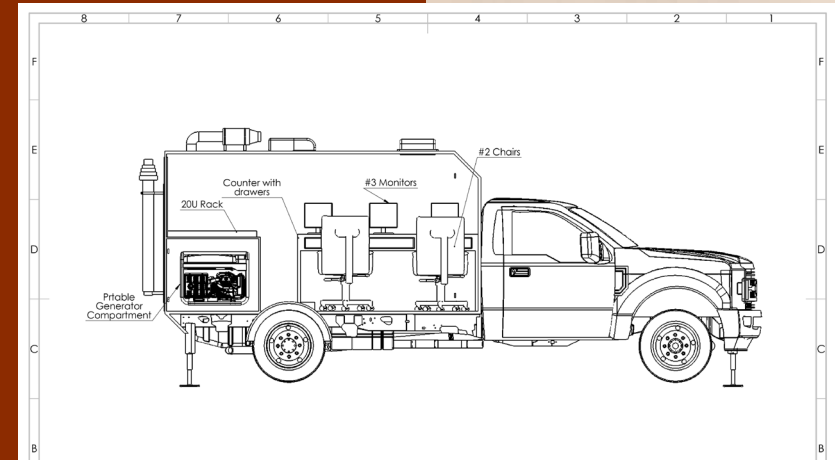

[D] MANUFACTURING CONSULTATIONS:

We consider this service an important element in contributing to the success of projects related to transforming the idea and need into implementable specifications and plans. We prepare an integrated study of the project and its needs; analyze global experiences in the same field to add qualitative value to the product or service that we provide. Furthermore, we develop the plans using the engineering and technical drawings and designs that suit the project and its use conditions use. We process the engineering approval procedures. Besides, we make a budget for implementation and the work performance period.

Our services do not stop here. We continue to supervise the implementation of the work, ensure the implementation of the project specifications, conduct business evaluations and verification, and prepare technical reports for the client.
